Summary

On track to earn a PhD in Biology at the University of Tromsø, I am a marine biologist with advanced bioinformatics skills developed during my doctoral research. I aim to apply my expertise in managing and analyzing high-throughput sequencing data to tackle challenges in aquatic health and sustainable aquaculture. Dedicated, organized, and a lifelong learner, I am driven to make meaningful contributions to biological research and innovation.

WORK EXPERIENCE

09/2018 – 2025

Norwegian College of Fishery Science (NFH) – University of Tromsø, Norway

PhD: Biology

Thesis (working title): *An 'omics approach to identifying Correlates of Protection for a SAV-3 vaccine in Atlantic salmon (Salmo salar)*

01/2018 – 08/2018

Senior Engineer (30%) | Norwegian College of Fishery Science (NFH) – University of Tromsø, Norway

02/2017 – 12/2017

Intern | Norwegian College of Fishery Science (NFH) – University of Tromsø, Norway

- Developing lab skills, learning molecular biology methods and bioinformatics
- Phenotypic and genetic characterization of Greenland shark (*Somniosus microcephalus*) parasites
- Library preparation for target enrichment and Illumina Next Generation Sequencing (NGS)
- Use of microsatellite data to understand reproductive barriers in Arctic charr (*Salvelinus alpinus*) and brown trout (*Salmo trutta*)

02/2014 – 06/2016

Aquaculture technician | Troms Kråkebolle AS, Norway

Management of hatchery and sea site operations

- Broodstock management and reproduction of green sea urchin (*Strongylocentrotus droebachiensis*)
- Larvae production and start feeding
- Microalgae production
- Sea site management

08/2010 – 01/2014

Research assistant | Centre of Marine Sciences (CCMAR), University of Algarve, Portugal

- **ProSpawn:** research and development project for the "Implementation of natural spawning in marine fish species in culture - Improving the quality of offspring and welfare". Part of the EU's 7th Framework Programme. Tasks included:
 - Hormone quantification
 - Experimental design and sampling
 - Management of a Senegalese sole (*Solea senegalensis*) broodstock
- **INUTR:** national research and development project aiming to develop: 1) an aquaculture feed that mitigates the effects of "winter syndrome" in sea bream (*Sparus aurata*); 2) a series of molecular markers to assess fish condition, by resorting to proteomics, genomics and metabolomics tools. Tasks included:
 - Maintaining experimental fish stock
 - Sampling
 - Metabolomics
- Secondary role in lab management and logistical support in other projects belonging to the research group

09/2007 – 09/2009

Trainee | Matís ohf., Iceland

- **CodLight-Tech:** research and development project for the "Control of growth and sexual maturation by use of Cold Cathode Light technology", Part of EU's 6th Framework Programme. Tasks included:
 - Sampling
 - Data analysis
 - Genotyping

EDUCATION

09/2007 – 05/2013

Hólar University College | Hólar, Iceland

MSc: Aquatic Biology

Thesis Title: Control of sexual maturation and growth in Atlantic cod (*Gadus morhua*) by use of Cold Cathode Light technology

09/2009 – 12/2009

Norwegian University of Life Sciences | Ås, Norway

Exchange student – NOVA program

Aquaculture Engineering – Planning and designing the expansion of a SalMar hatchery
General Aquaculture Breeding and Genetics

09/2003 – 09/2007

University of Algarve | Faro, Portugal

BSc: Marine Biology and Fisheries

TECHNICAL SKILLS AND EXPERIENCE

- Programming
 - Advanced proficiency in R
 - Intermediate knowledge of Bash scripting
 - Basic skills in Python, Git, HTML, and CSS
 - Learning SQL
 - Experienced in using Markdown
 - Basic knowledge of LaTeX for scientific writing and formatting
- Software proficiency
 - Skilled in the Microsoft Office Suite, including Word, Excel, and PowerPoint
- Data analysis and Visualization
 - Experienced in managing, analysing, and visualizing high-throughput sequencing data
- Field Sampling and Laboratory Expertise
 - Conducted sampling of marine and freshwater species in an aquaculture research and development context
 - Collected water and sediment samples for environmental DNA (eDNA) analysis
 - Extensive wet-lab experience, with a strong focus on molecular biology and next-generation sequencing (NGS) techniques

- Skilled in overseeing and maintaining laboratory operations, ensuring compliance with protocols and safety standards

PERSONAL SKILLS

- Mother tongue: Portuguese
- Other languages
 - English: Proficient user
 - Norwegian: Intermediate user
 - Spanish: Basic user
